KOREAN PATENT ABSTRACTS
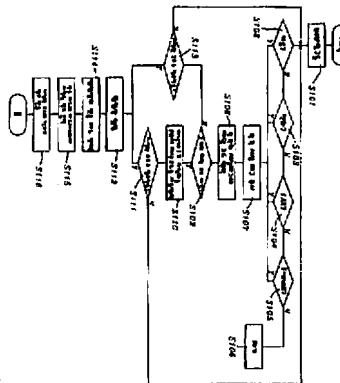

(54) METHOD FOR TRANSFERRING AND STORING MESSAGE IN PERSONAL DIGITAL ASSISTANTS

(57) Abstract:

PURPOSE: A method for transferring and storing message in a PDA(Personal Digital Assistants) is provided to easily use the PDA and to input variously into the PDA by executing automatically the storing and transfer of information after inputting a telephone number or a name into a display window. CONSTITUTION: If a display window is opened (S101), then one of the specified keys is selected for executing(S102-S105). A tag for executing is displayed on a memo window(S107). After the code number corresponding to the specified keys respectively is inputted on the side of the tag, which is displayed on the memo window(S108), and it is determined whether the corresponding code number is stored(S109). The code number is inputted automatically by the specified key in the program designated by the corresponding tag(S110). If the transmission of the necessary information for the specified code is determined(S111), a pop-up window is opened(S112), otherwise the display window is on standby. When the pop-up window is opened, a transmission menu is selected (S114), and the information stored in the hard memory of the transmission menu is output and displayed(S115). The output information is transmitted as the code number of the specified tag(S116).
